## EXPERIENCE

---

### Frontend Developer — PT. Indomarco Prismatama

09/2022 — Present

- Shipped core features for production mobile apps: real-time notifications, user authentication, data synchronization, and in-app purchases, serving 10,000+ users.
- Built intuitive UI with Flutter's widget system; simplified the purchasing flow from 4 steps to 3.

### Project Lead — Service Management System (client project)

07/2025 — 12/2025

- Delivered a full-stack platform end-to-end, replacing fully paper-based operations: sales pipeline tracking, maintenance scheduling with automated reminders, and real-time notifications.
- Led a 3-person team — planned sprints, reviewed work, and unblocked teammates to keep delivery on schedule.
- Acted as primary client liaison: gathered requirements, translated business needs into technical specs, and managed feature priorities and release timelines.
- Digitized paper-only workflows for 20+ daily active users (50 accounts across Sales, Admin, Superuser); monthly sales recap went from weeks of paper-and-Excel work to automated, real-time reporting.
- Designed the application's UI/UX and built frontend components; branch-level separation built in so new locations onboard without rework.
- Stack: Next.js, TypeScript, Prisma, PostgreSQL, Docker.

### Full Stack Developer — Flutter mobile application (client project)

09/2022 — 12/2022

- Rebuilt the app UI in Flutter with custom widgets and animations; state management with Provider, Bloc, and GetX.
- Integrated backend APIs via Dio/http packages.

### Frontend Intern — PT. Indomarco Prismatama

09/2020 — 09/2022

- Assisted in developing production Flutter/Dart applications; implemented UI components and tested navigation and animations.

### Full Stack Developer — Java Android applications (client project)

02/2020 — 08/2020

- Designed Android apps in Android Studio using Material Design; built user authentication and document generation (PDF, DOCX).

### Teaching Assistant — Bina Nusantara, Bluejacket Binus

02/2018 — 12/2020

- Taught undergraduates, managed exams, and created syllabus materials; built games, e-commerce websites, and mobile apps.

## SKILLS

---

**Mobile:** Flutter, Dart, Java, iOS & Android App Development

**Web:** Next.js, TypeScript, JavaScript

**Data & Infra:** Firebase, PostgreSQL, SQL, Prisma, Docker

**Tools & Other:** Git, C, C#, Operating Systems

## EDUCATION

---

**Bina Nusantara University** — Master of Information Technology · Bachelor of Computer Science

2021
